ACATIS – GANÉ VALUE EVENT FONDS UI

Dear Unitholder,

We are pleased to present the annual report as at 30 September 2017 for the investment fund established on 15 December 2008 under the name

ACATIS – GANÉ VALUE EVENT FONDS UI

Investment objectives and investment policy during the reporting period

The Fund's approach combines the value investing and event driven value investment styles. To the advisor team, value investing means avoiding fundamental risks by purchasing companies with excellent business quality, good management and attractive valuations. The event driven value approach is aimed at reducing market price risks by focusing on positive events that help to increase the value of investments. Through a cash-flow-oriented approach and by establishing a time-weighted return, investments in equities and bonds are made comparable to one another, and weighted accordingly. This requires a high degree of predictability and certainty of cash flows. Accordingly, the focus for equities is placed on profitable business, and for interest-bearing securities on financial stability. A variable liquidity reserve makes it possible to take advantage of opportunities as they arise. The combination of the value and event approaches is intended to significantly reduce the risk profile compared to a pure equities investment and achieve more stable performance. The target with respect to returns and market price fluctuations is an equity market beta of 0.3 to 0.6.

Structure of the portfolio and significant changes during the reporting period

The equity allocation fell to 65%, 8% down on the previous year. The earnings and distribution performance of the companies in the portfolio remained very positive. The very high quality of the companies and their high distribution yields, consisting of share repurchases and dividends, which sometimes amount to several times the distributions of comparable good-quality government bonds in the current low-interest environment, mean that the equity components remain an indispensable element in the long-term allocation of the Fund. The higher valuations lead to a reduced equity allocation compared to the previous year and require vigilant monitoring of future market developments.

The proportion of bonds fell from 23% to 15% during the reporting period. The decrease is partly due to the maturities of short-term, high-quality corporate bonds, as well as the active reduction of securities with potential interest rate risks. The majority of bonds are characterised by money market rates with short maturities and good credit ratings.

Liquidity holdings increased from 4% to 21.7% with the aim of achieving a robust and flexible portfolio.

Macroeconomic factors continued to play only a secondary role during the financial year, since the investment focus is primarily on the valuation and prospects of the companies considered, as well as their equity capital and debt securities, as specified in the fundamental investment policy.

At the end of the reporting period, the bond portfolio had an average coupon rate of 3.6% (3.7% in the previous year) and an expected yield to maturity of 1.3% (3.8% in the previous year). Bonds were denominated as follows: 83% in EUR, 11% in BRL and 6% in USD.

As in the previous year, the main emphasis for regional equity investments was on the USA, followed by Germany. Other countries included Denmark, Luxembourg, Switzerland, Belgium, New Zealand, France and Sweden. With regard to industrial sectors, the areas of consumer goods and trade accounted for a total of 32%, followed by finance at 32%, health (16%), information technology (15%) and energy (5%).

Significant risks

Market price risk: The Fund's market price risk on a 10-day basis amounted on the reporting date to 2.1% (3.4% in the previous year), measured at value at risk (confidence level: 95%). On a 250-day basis, the market price risk was 10.4% (16.9% in the previous year). Equity risk remained the largest risk component, with inflation and interest rate risk, for example, playing a less important role.

Currency risk: Once again, the main emphasis was on investments in EUR at 54% (49% in the previous year). The foreign currency portion in US dollars was 23% (30% in the previous year). 23% was attributable to HKD, DKK, CHF, NZD, BRL and SEK. This ranking was not the result of a strategic decision in favour of or against any particular currency, but was instead the result of the choice of titles.

Credit risk: The bond portfolio had an average credit rating of BBB+ (BB+ in the previous year) at the end of the reporting period.

Fund net income

The main sources of positive disposal gains during the reporting period were realised gains on disposals of foreign shares.

Performance during the reporting period

(1 October 2016 to 30 September 2017)

Unit class A	+12.62% ¹⁾
Unit class B	+13.19% ¹⁾
Unit class C	+12.60% ¹⁾
Unit class D	+ 2.35% (07/06/2017-30/09/2017) ¹⁾
Benchmark ²⁾	+6.18%

The Company ensures that investor interests are not adversely affected by transaction costs by setting a limit for transaction costs based on average Fund volume, and for the portfolio turnover rate, taking into account the investment objectives of this Fund. The company monitors the compliance with the threshold values and takes further measures if they are exceeded.

Notes pursuant to Section 7(9) of the German Capital Investment Accounting and Valuation Ordinance (“KARBV”)

Information according to the German Derivatives Ordinance (DerivateV)

Underlying exposure obtained through derivatives EUR 0.00

Securities holdings as a percentage of fund assets 79.28
Derivatives holdings as a percentage of net assets 0.00

Since 15/01/2010, the Company has used the qualified approach as defined in the German Derivatives Ordinance using reference assets, when determining the extent of the market risk for this Fund. The value at risk figures were calculated using the historical simulation method with a 99% confidence level and 1 day holding period, using an effective historical observation period of one year. Market risk means the risk to which the Fund is exposed due to possibly unfavourable changes in market prices.

Potential exposure to market risk in accordance with Section 37(4) DerivateV

lowest potential market risk 0.87%
 highest potential market risk 1.79%
 average potential market risk 1.31%

Average leverage achieved using derivatives transactions during the financial year: 0.91

Composition of the reference portfolio at the reporting date

JP Morgan GBI Global (Traded) (FactSet: JPM00004) 20.00%
 MSCI World (EUR) (FactSet: 990100) 80.00%

Specification of procedures for the valuation of assets

Valuation

For currencies, shares, bonds and derivatives that can be traded on a stock exchange or another organised market or can be included within this category, the last available trading price will be taken as a basis in accordance with Section 27 of the KARBV.

In accordance with Section 29 of the KARBV, the current values are used as the basis for investment fund units, and the par value or redemption amount is used as the basis for bank balances and liabilities.

Assets that are not admitted to trading on a stock exchange or another organised market, or included in the regulated market or OTC trading on a stock exchange, or for which there is no tradable price available, are valued pursuant to Section 28 KARBV in conjunction with Section 168(3) of the German Capital Investment Code (KAGB), at a market value that is reasonable upon careful estimation in accordance with suitable valuation models taking the current market conditions into account. Market value is considered to be the amount for which the asset concerned could be exchanged in a transaction between knowledgeable, willing and independent counterparties.

Information about transparency and the total cost ratio

Total expense ratio

ACATIS – GANÉ VALUE EVENT FONDS UI unit class A

The total expense ratio (not including transaction costs) was for the financial year just ended 1.79%
 The total expense ratio expresses all of the expenses and payments (not including transaction costs) made by the Fund during the course of the year as a percentage of the average net asset value of the Fund.

	in EUR million	6.2
of which executives	in EUR million	5.3
of which other risk takers	in EUR million	0.9

Remuneration system of the Capital management company

Universal-Investment-Gesellschaft mbH is subject to the supervisory requirements applicable to Capital management companies in relation to the design of its remuneration system. The company has regulated the detailed design in remuneration guidelines, the aim of which is to ensure a sustainable remuneration system and to prevent false incentives to enter into excessive risks. The remuneration system of the Capital management company is reviewed at least once a year by the Remuneration Committee of Universal Investment in terms of its suitability and compliance with all legal requirements. It comprises fixed and variable elements of the remuneration. The definition of ranges for total target remuneration ensures that there is no significant dependence on the variable remuneration and there is a suitable ratio of variable to fixed remuneration. Special rules apply to the Management Board of the Capital management company and employees whose work has a significant effect on the overall risk profile of the Capital management company and the investment funds it manages (risk takers). Therefore, at least 40% of the variable remuneration is deferred over a period of at least three years for these risk-relevant employees. The deferred portion of the remuneration is therefore dependent on the risk during this period, which means that it may be reduced in the case of negative contributions to success on the part of the employee or the Capital management company as a whole. At the end of each year during the waiting period, the deferred portion of the remuneration is vested pro rata and paid out on the respective payment date.

ACATIS – GANÉ VALUE EVENT FONDS UI

AUDITOR'S REPORT

To: Universal-Investment-Gesellschaft mbH, Frankfurt am Main

Universal-Investment-Gesellschaft mbH instructed us to audit the annual report of the ACATIS – GANÉ VALUE EVENT FONDS UI Fund for the financial year from 01/10/2016 to 30/09/2017 in accordance with Section 102 of the KAGB.

Responsibility of the legal representative

The preparation of the Annual Report in accordance with the requirements of the KAGB is the responsibility of the legal representative of the Capital management company.

Responsibility of the auditor

Our responsibility is to express an opinion on the annual report based on our audit.

We conducted our audit in accordance with Section 102 of the KAGB and German generally accepted standards for the audit of financial statements issued by the German Institut der Wirtschaftsprüfer (IDW). The standards require that we plan and perform an audit so that misstatements materially affecting the annual report are detected with reasonable assurance. Knowledge of the Fund's management and expectations as to possible misstatements are taken into account when determining audit procedures. Within the framework of the audit the efficacy of the accounting-related internal control system and the evidence for the data presented in the annual report are evaluated mainly on the basis of random tests.

The audit includes an assessment of the accounting principles used for the annual report and material estimates by the legal representatives of the Capital management company. We are of the opinion that our audit forms a reasonable basis for our assessment.

Audit opinion

Based on the knowledge gained during our audit, we believe the annual report for the financial year from 01/10/2016 to 30/09/2017 complies with the statutory provisions.
