CAPITAL MANAGEMENT COMPANY:

Berenberg Euro Enhanced Liquidity

ANNUAL REPORT AS AT 31 DECEMBER 2022

CUSTODIAN:

ASSET MANAGEMENT AND DISTRIBUTOR:

Activity Report for the Reporting Period from 1 January 2022 to 31 December 2022

Investment objective and investment policy for achieving the investment objectives

The Fund is composed of at least 51% euro-denominated bonds and money market instruments of European issuers with investment grade credit ratings (AAA to BBB-according to the rating classification of the Standard & Poor's agency). The investment strategy focuses on euro-denominated government bonds, government-guaranteed bonds, covered bonds, corporate bonds and money market securities. Any foreign currency risks are to be hedged to a large extent. In addition, active and dynamic duration management is possible, with a focus on short maturities in line with the investment horizon.

The capital market environment in 2022 was one of the most challenging since the financial market crisis in 2008. The bond markets in particular were the focus of market activity this time and were shaped by a large number of issues over the course of the year. It was already apparent in the first quarter that the unchecked rise in inflation figures could lead to a turnaround in central bank policy and that a more restrictive approach would be adopted. At the end of 2021, communication from the European Central Bank (ECB) was much more subdued. However, at the latest with Russia's invasion of Ukraine and the resulting sharp rise in commodity prices, especially natural gas and crude oil, the ECB sharpened its tone and no longer ruled out interest rate hikes and a reduction in the bond purchase program.

In the U.S., the Fed was already one step ahead, initiating a series of rate hikes later in the year with the first move of 25 basis points in March. There was also no easing of inflation figures in the following months. While the Fed increasingly pursued a more restrictive strategy, the ECB only raised the key interest rate by 50 basis points in July. This was the first rate hike in more than eleven years. However, the ECB failed to elaborate on the issue of fragmentation within the eurozone. As a result, risk premiums on government bonds from the periphery, especially Italy, rose significantly. It was only after an emergency meeting and the announcement of the development of a new crisis tool, the later TPI - Transmission Protection Instrument, that the situation calmed down. Increasingly, recession concerns arose among market participants over the summer, coupled with unchanged sharp rise in inflation figures. Consumer prices in the eurozone rose by +10.6% year-on-year in October, reaching double-digit levels for the first time since the introduction of the single currency. Despite the gloomy economic outlook, the ECB continued its restrictive strategy with a series of interest rate hikes. In the December meeting, the ECB raised the key interest rate by another 50 basis points to 2.5%. Furthermore, the ECB announced that it would soon start quantitative tightening (QT). From March 2023, there will be no monthly reinvestment in the EUR 15 billion maturing bond. The ECB also made it clear that there will be further significant interest rate hikes for the coming year. However, it remains to be seen at the end of the year to what extent the ECB will have to raise interest rates in order to bring inflation down in the long term, or to what extent the deteriorating economy itself will contribute to a decline in inflation.

The year 2022 was marked by a difficult economic environment with persistently high inflation figures and increasing recession concerns, which is why pensions were unable to hold their own. On the one hand, risk-free interest rates rose noticeably. Interest-rate-sensitive sectors, such as real estate, recorded above-average widening of risk premiums. Overall, euro-denominated bonds experienced the worst year by far since the introduction of the euro. In many sub-segments, the decline was even in the double-digit range.

Berenberg Euro Enhanced Liquidity was unable to escape the environment of rising yields and risk premiums in calendar year 2022 and thus recorded a decline. Nevertheless, the effect of rising risk-free interest rates was able to be mitigated by the use of interest rate derivatives. In addition, the Fund was positioned more defensively within a year. The average rating of A- was one notch higher than at the beginning of the period (BBB+). The total number of AAA and AA rated bonds stood at 14.0% (+8.8% points) at the end of the year. This increase was mainly due to the higher weighting of covered bonds of 19.8% (+11.6 percentage points).

In order to optimise portfolio returns, the Fund participated in various new issues. For example, in November 2022, a bond issued by Hamburg Commercial Bank

(DE000HCB0BQ0) with a coupon of 6.25% and a final maturity date of 18/11/2024 was subscribed and allocated to the mandate.

As of 31/12/2022, Berenberg Euro Enhanced Liquidity has the following key performance indicators:

Yield of the bond component: 4.31% Average duration: 1.67 Average remaining maturity: 2.31 years

Average rating: A-Number of bonds: 160

Material risks

General market price risks

The price or market performance of financial products depends in particular on the development of the capital markets, which in turn is influenced by the general shape of the global economy, and the economic and political conditions in the respective countries. The general development of securities prices, especially on a stock exchange, can also be affected by irrational factors such as sentiment, opinion and rumour.

Developments resulting from the COVID-19 pandemic have been a particular source of uncertainty in terms of price/market value developments over the last financial year.

The Ukraine crisis and the resulting market turbulence and sanctions imposed by the industrialised nations against Russia are having a range of different effects on the financial markets in general and on funds in particular. The movements on the stock exchanges are reflected accordingly in the Fund assets (value of the Fund). In addition, uncertainties about the further course of the conflict and the economic consequences of the various sanctions are weighing on the markets.

Risks of interest rate change

Investment in fixed-income securities is associated with the possibility that the market interest rate level existing at the time a security is issued may change. As a rule, the prices of fixed-interest securities fall when market yields rise above the interest rates at the time of acquisition. Similarly, if the market yield falls, the prices of fixed-interest securities rise. These price changes cause the current yield on fixed-interest securities to correspond approximately to the current market yield. The extent of this price performance, however, differs depending on the maturity of the fixed-interest securities. Fixed-interest securities with shorter maturities carry a lower interest rate change/price risk than

fixed-interest securities with longer maturities.

Default risks/issuer risks

Risk of counterparty default. The investment fund can suffer losses from the default of an issuer or counterparty. Issuer risk is the effect of particular developments at the issuer that affect the price of a security separately from the general trends in the capital markets. Even if the utmost care is exercised in selecting the securities, losses due to the financial collapse of issuers cannot be ruled out. Counterparty risk includes the risk that a party to a mutual agreement will default on the claim, in whole or in part. This applies to all contracts entered into for the account of the Investment Fund.

Credit risks

In the case of bonds, a debtor's rating can change. Depending on whether the credit rating rises or falls, the price of the security may change.

Risks in connection with derivative transactions

The company may conduct transactions with derivatives for the account of the Fund both for hedging purposes and for investment purposes. The hedging transactions serve to reduce the overall risk of the Fund, but may also reduce the chances of returns.

Buying and selling options or entering into futures contracts or swaps is associated with the following risks:

- Changes in the price of the underlying instrument can reduce the value of an option right or futures contract to the point where it is worthless. The Fund can also suffer losses from changes in the value of the assets underlying a swap.
- Closing out a position with an offsetting transaction, when necessary, generates costs.
- The value of the Fund can be more strongly influenced by the leverage effect of options than would be the case if the underlying instruments were acquired directly.
- The purchase of options entails the risk that the price of the underlying instrument might not change as expected, leading to expiration of the option without exercise and consequent loss of the option premium paid by the Fund. When options are sold, there is a risk that the Fund may be obliged to accept/deliver assets at a price that differs from the current market price.
- With futures contracts too, there is a risk that the Fund will suffer losses as a result of unexpected changes in the market price on expiration.

Currency risks

If assets of a Fund are invested in currencies other than the Fund currency, the Fund receives income, repayments and proceeds from such investments in that currency. If the value of that currency falls as compared to the Fund currency, the value of the Fund is reduced.

Fund performance

The main sources of the negative disposal result during the reporting period were realised losses from foreign bonds.

The company ensures that investor interests are not adversely affected by transaction costs, by setting a limit for transaction costs based on average Fund volume, and for the portfolio turnover rate, taking into account the investment objectives of this Fund. The company monitors compliance with the limits and takes further measures if they are exceeded.

^{*)} In the case of unlisted securities, for technical reasons securities held to maturity may also be reported.

Since 27/03/2017, the company has used the qualified approach as defined in the German Derivatives Ordinance using reference assets, when determining the extent of the market risk for this Fund. The value-atrisk figures were calculated using the historical simulation method with a 99% confidence level and 1-day holding period, using an effective historical observation period of one year. Market risk means the risk to which the Fund is exposed due to possibly unfavourable changes in market prices.

Specification of procedures for the valuation of assets

Valuation

The procedures outlined below for the valuation of assets take account of any market effects resulting from the COVID-19 pandemic. No additional valuation adjustments were necessary.

For currencies, shares, bonds and derivatives that can be traded on a stock exchange or another organised market or can be included within this category, the last available trading price will be taken as a basis in accordance with Section 27 of the KARBV.

In accordance with Section 29 KARBV, the current values are used as the basis for investment fund units, and the par value or redemption amount is used as the basis for bank balances and liabilities.

Assets that are not admitted to trading on a stock exchange or another organised market or included in the regulated market or OTC trading on a stock exchange, or for which there is no tradeable price available, are valued pursuant to Section 28 KARBV in conjunction with Section 168(3) of the German Capital Investment Code (KAGB), at a market value that is reasonable upon careful estimation in accordance with suitable valuation models taking the current market conditions into account.

Market value is considered to be the amount for which the asset concerned could be exchanged in a transaction between knowledgeable, willing and independent counterparties.

Information about transparency and the total expense ratio Total expense ratio Berenberg Euro Enhanced Liquidity AK I D

The total expense ratio (excluding transaction costs) for the past financial year amounts to

0.43 %

The total expense ratio expresses all of the expenses and payments (excluding transaction costs) incurred by the Fund during the course of the year as a percentage of the average net asset value of the Fund.

Flat-rate remuneration paid to the management company or third parties

Notes pursuant to Section 7(9) of the German Capital Investment Accounting and Valuation Ordinance ("KARBV")

Remuneration system of the capital management company

Universal-Investment-Gesellschaft mbH is subject to the supervisory requirements applicable to capital management companies in relation to the design of its remuneration system. The company has regulated the design in detail in remuneration guidelines, the aim of which is to ensure a sustainable remuneration system taking sustainable corporate governance into account and to prevent false incentives to enter into excessive risks (including relevant sustainability risks).

The remuneration system of the capital management company is reviewed at least once a year by the Remuneration Committee of Universal Investment in terms of its suitability and compliance with all legal and internal and external regulatory requirements. It comprises fixed and variable elements of the remuneration. The definition of ranges for total target remuneration ensures that there is no significant dependence on variable remuneration, and that there is a suitable ratio of variable to fixed remuneration. Special rules apply to the Management Board of the capital management company and employees whose work has a significant effect on the overall risk profile of the capital management company and the investment funds it manages (risk takers). Risk-relevant employees whose variable remuneration does not exceed a threshold of EUR 50 thousand for the respective financial year will receive the variable remuneration in full in the form of a cash payment. If this threshold is exceeded for risk-relevant employees, a share of 40% of the variable remuneration is deferred over a period of three years. The deferred portion of the remuneration is therefore dependent on the risk during this period, which means that it may be reduced in the case of negative contributions to success on the part of the employee or the capital management company as a whole. At the end of each year during the waiting period, the deferred portion of the remuneration is vested pro rata and paid out on the respective payment date.

Insofar as portfolio management is outsourced, no employee remuneration is paid directly from the Fund.

Information according to Section 101(2) No. 5 KAGB

Material medium- to long-term risks

The information on material medium- to long-term risks is provided in the activity report.

Composition of the portfolio, portfolio turnover and portfolio turnover costs

Information on the composition of the portfolio is provided within the statement of assets.

The information on portfolio turnover is provided within the statement of assets and within the statement of transactions concluded during the reporting period.

The transaction costs are disclosed in the Notes.

Notes pursuant to Section 7(9) of the German Capital Investment Accounting and Valuation Ordinance ("KARBV")

Consideration of the medium- to long-term development of the company in the investment decision

The selection of individual securities depends on the investment strategy. The contractual basis for investment decisions can be found in the agreed Terms and Conditions of Investment and, if applicable, the investment quidelines. The medium- to long-term performance of the portfolio companies is taken into account if this is stipulated in the contractual terms.

Use of proxy advisers

Disclosures regarding non-financial performance indicators

Article 8 Sustainable Finance Disclosure Regulation (financial products that promote environmental and/or social characteristics)

The Principal Adverse Impacts (PAI) on sustainability factors are taken into account in the investment process at company level. It is mandatory to take PAIs into account at Fund level and for this reason they are taken into account in this way.

For further information about the environmental and/or social characteristics and on taking the PAIs on sustainability factors into account, please see the annex "Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852".

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities

ANNEX

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Berenberg Euro Enhanced Liquidity

Legal entity identifier: 549300XVFR6ACJKIED98

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
• • 🗆 Yes	●○⊠ No	
□ It made sustainable investments with an environmental objective: % □ in economic activities that qualify as environmentally sustainable under the EU Taxonomy □ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective	
☐ It made sustainable investments with a social objective:%	☑ It promoted E/S characteristics, but did not make any sustainable investments.	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Fund promoted environmental and social characteristics within the meaning of Article 8 of the Sustainable Finance Disclosure Regulation.

In the investment decisions, environmental and social characteristics are taken into account, such as climate change and pollution in the field of environment, working conditions, health and safety in the field of social affairs. In addition, aspects in the area of corporate governance are taken into account.

The Fund applied activity-related exclusions. Companies conducting the following activities are excluded in whole or in part:

- Tobacco (production) > 5.00% turnover
- Atomic/nuclear energy > 5.00% turnover
- Nuclear weapons (upstream, production, downstream) > 5.00% turnover
- Conventional weapons (upstream, production, downstream) > 5.00% turnover
- Unconventional weapons (upstream, production, downstream) > 0% turnover
- Coal (upstream, production, downstream) > 25.00% turnover
- So-called unconventional oil and gas (production) > 5% turnover

The Fund applied standard-based screening in relation to the UN Global Compact, OECD Guidelines and the International Labour Organization (ILO).

The Fund applied the following exclusions to sovereign exposures:

- States with serious violations of democratic rights and human rights are excluded on the basis of Freedom House's assessment,
- Government bonds issued by countries that have a Government ESG rating of lower than B by MSCI ESG Research.

Exclusions are applied at the level of specific economic activities rather than at the sector level.

In the area of **sovereign bonds**, we exclude countries that violate our ESG exclusion criteria, including the exclusion of countries that have an ESG rating of lower than B from MSCI ESG Research and countries that are classified as "Not free" in the "Freedom House Index".

The following exclusion criteria apply at the **individual security level**:

The ESG exclusion process excludes **corporate bonds issued by companies** associated with certain products or activities, including: controversial weapons, conventional arms and defence industry, coal mining and power generation, nuclear energy, so-called unconventional oil and gas or tobacco (more detailed information can be found in the Berenberg Wealth and Asset Management Exclusion Policy, which is publicly available on our website (www.berenberg.de/en).

In addition, we exclude issuers with controversial behaviour. This includes companies that violate the United Nations Global Compact Principles as well as companies that are involved in particularly serious ESG controversies based on the ESG controversy analysis of our external ESG data provider.

The exclusion criteria for the use of active **target funds**, **ETPs/ETFs and derivatives/certificates** differ from the exclusion criteria at the individual security level mentioned above and are described below:

The review of the active **target funds** is carried out within the framework of an integral qualitative and quantitative analysis. The core element is a specially developed questionnaire and personal discussions with the asset managers of the target funds used. In addition, the process is rounded off by sustainability assessments by recognised external agencies. At regular intervals, a standardised and systematic evaluation of the collected information is carried out, on the basis of which an internal score is created. When purchasing new target funds, compliance is an elementary component of the requirements with minimum standards defined as exclusion criteria:

- Exclusion of investment companies that do not sign the "UN Principles for Responsible Investment" and violate the "United Nations Global Compact Principles".
- Complete exclusion of producers of controversial weapons and their suppliers of critical components from the target fund's single-stock investment universe.

Existing positions are reviewed regularly for compliance. A reassessment takes place internally if new findings arise with regard to the violation of the minimum standards mentioned. Subsequently, the asset manager is contacted in order to achieve renewed compliance with the minimum standards. This exchange of information can extend over a longer period of time (maximum 12 months). If there is no change, the position is sold to preserve interests.

When using **ETPs/ETFs**, we aim to participate in the development of the index. We only invest in ETPs/ETFs from providers that are signatories to the "UN Principles for Responsible Investment", do not violate the "United Nations Global Compact Principles" and do not have particularly serious ESG controversies.

Derivatives and certificates

- When using OTC derivatives/certificates on individual securities, the securities-specific exclusion criteria described above apply to both the underlying instrument and the issuer or counterparty.
- When using exchange-traded derivatives on individual securities, the securities-specific exclusion criteria described above apply only to the underlying instrument.

Indices

- When using derivatives/certificates on indices, we aim to participate in the development of the index and efficiently managing portfolio risks. Therefore, there is no overview of the individual securities of the index and the application of individual stock-specific exclusion criteria.
- For OTC derivatives/certificates on indices, the individual security-specific exclusion criteria described above apply only to the issuer or counterparty.

How did the sustainability indicators perform?

All sustainability indicators of the Fund used to meet the environmental and/or social characteristics of the Fund were met during the reference period. Compliance with the environmental and/or social criteria for the selection of assets is checked both before and after their purchase.

In addition, the Fund was obliged to take the following sustainability factors into account in its strategy and discloses the adverse impacts on these:

- Exposure to companies active in the fossil fuel sector are 2.45%
 (Metric: Share of investments in companies active in the fossil fuel sector)
- Share of energy generation from non-renewable energy sources 77.77% (Metric: Share of non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources)
- Activities negatively affecting biodiversity-sensitive areas 0.62%
 (Metric: Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas)
- Emissions to water 0.0002
 (Metric: Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average)
- Hazardous waste and radioactive waste ratio 0.0840
 (Metric: Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average)
- Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises 0.00%
 - (Metric: Share of investments in companies that have been involved in violations of the UN Global Compact Principles or OECD Guidelines for Multinational Enterprises)
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises 19.46% (Metric: Share of investments in companies without policies to monitor compliance with the UN Global Compact Principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UN Global Compact Principles or OECD Guidelines for Multinational Enterprises)

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) 0.00% (Metric: Share of investments in investee companies involved in the manufacture or selling of controversial weapons)
- Investee countries subject to social violations 0 (Metric: Number of investee countries subject to social violations, as referred to in international treaties and conventions, United Nations principles and, where applicable, national law
- Investee countries subject to social violations 0.00% (Metric: Percentage of investee countries subject to social violations in accordance with international treaties and conventions, the principles of the United Nations or, where applicable, national legislation)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally economic The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund takes into account adverse impacts on sustainability factors (Principal Adverse Impacts = PAIs) through binding elements of its investment strategy at the individual security level. More specifically, PAIs were mandatorily taken into account by means of activity-related exclusions based on company income, as well as through standard-related exclusions.

Information on how this financial product has taken the PAIs into account is disclosed in the periodic reports to be published in accordance with Article 11(2) SFDR.

The PAI indicators taken into account in the investment strategy are as follows:

4. "Exposure to companies active in the fossil fuel sector", through:

turnover-based exclusion criteria for companies involved in:

- energy production from coal
- mining and distribution of thermal coal
- extraction of oil and gas from unconventional sources.

Principal adverse **impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

7. "Activities negatively affecting biodiversity-sensitive areas" and 28. "Land degradation, desertification, soil sealing", through:

exclusion criterion for companies with direct links to ongoing ESG controversies that are particularly serious, including with regard to biodiversity and land use.

8. "Emissions to water" and 9. "Hazardous waste and radioactive waste ratio", through:

exclusion criterion for companies with direct links to ongoing ESG controversies that are particularly serious, including with regard to harmful emissions and waste.

10. "Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises" and 11. "Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises" through:

exclusion criteria for companies exhibiting serious violations of UN Global Compact Principles and OECD Guidelines for Multinational Enterprises, as well as other international standards and frameworks.

14. "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)", through:

exclusion criterion for companies involved in the production and/or distribution of controversial weapons (including anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

16. "Investee countries subject to social violations", due to, among others: Exclusion criterion for sovereign bonds of countries classified as "Not free" in the Freedom House Index.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period, which is: 01/01/2022-31/12/2022

Asset allocation describes the share of

investments in

specific assets.

What was the proportion of sustainability-related investments?

Sustainability-related investment refers to all investments that contribute to the achievement of the environmental and/or social characteristics set out in the investment strategy.

At the end of the financial year on 31/12/2022, this Fund was invested 100.00% in sustainability-related investments in accordance with the Fund's sustainability strategy. The percentage shows the proportion of sustainability-related investments in the securities portfolio.

What was the asset allocation?

As of 31/12/2022, 99.49% of the Fund was invested in bonds. The other investments were derivatives and cash equivalents.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Investments in bonds were mainly made in corporates (29.94%), financials banking (25.05%), financials non-banking (22.25%) and covered bonds (19.80%).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes:	
	☐ In fossil gas	☐ In nuclear energy
\boxtimes	No	

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

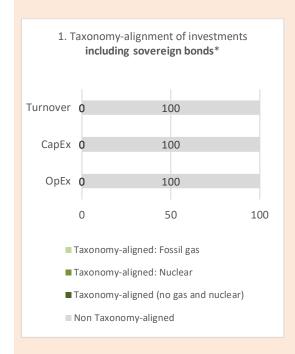

Taxonomy-aligned activities are expressed as a share of:

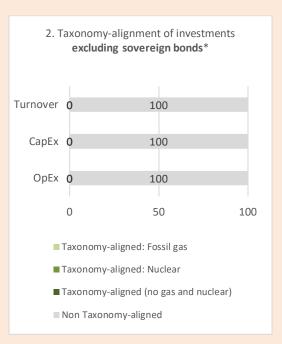

- turnover reflecting the current share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational
 expenditure (OpEx)
 reflecting green
 operational activities of
 investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the minimum percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

This Fund is not currently committed to investing in economic activities classified as enabling and transitional activities.

What investments were included under "Other", what was their purpose and were there any minimum environmental or social safeguards?

The "Other" category includes cash holding as well as investments in products that are only used for hedging purposes.

There are no mandatory criteria within the Fund's sustainability strategy with regard to the consideration of minimum environmental and/or social safeguards for other investments. This is due either to the nature of the assets, for which there are no legal requirements or market practices at the time of preparation of this report with regard to the way in which minimum environmental and/or social safeguards can be implemented for such assets or due to the specific exclusion of investments from the sustainability strategy, which are consequently not subject to the assessment of minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Compliance with the environmental and/or social characteristics of the Fund during the reference period was largely ensured through compliance with the quantitative sustainability indicators described above, together with the mandatory elements of the investment strategy. Compliance with the criteria is monitored prior to the acquisition of assets by portfolio management and after their acquisition by means of appropriate daily monitoring by the Investment Controlling department of the capital management company and on an ongoing basis by the portfolio manager.

The participation policy (exposure) of the capital management company was implemented by means of the exercising of voting rights. In order to safeguard the interests of investors in the managed funds and to take on the associated responsibility, the capital management company exercised the shareholders' and creditors' rights arising from the equity holdings of the managed funds in the interests of the investors. For the capital management company, the decision as to whether or not to exercise voting rights was based on the interests of the investors and the integrity of the market, as well as the benefits for the investment fund concerned and its investors.

The capital management company based its domestic voting behaviour on the BVI analysis guidelines for shareholders' meetings (*Analyserichtlinien für Gesellschafterversammlungen*), which are considered to be ESG compliant and, as the industry standard, form the basis for responsible dealings with investors, capital and rights.

In the case of foreign votes, the capital management company used the respective country-specific guidelines from Glass Lewis, which take local framework conditions into account. In addition, the Glass Lewis guidelines for "Environmental, Social & Governance (ESG) Initiatives" were applied to the specific country guidelines and were implemented as a priority. The application of these guidelines ensures that voting was country-specific and based on the criteria of a transparent and sustainable corporate governance policy, as well as on other environmental and social criteria aimed at the long-term success of companies held by investment funds (known as portfolio companies).

These voting standards are aligned with the interests of the funds managed by the capital management company and have therefore been applied as a rule for all funds, unless it is necessary to deviate from these voting guidelines for individual funds in the interests of the investors, market integrity or for the benefit of the investment fund concerned.

The capital management company publishes the principles of its participation policy and an annual participation report on its website.

The asset manager, if portfolio management is outsourced, or an appointed investment advisor, if applicable, may have taken additional measures to meet environmental and/or social characteristics as part of their corporate engagement activities. However, these engagement activities are not carried out on behalf of the Fund.

Frankfurt am Main, 02 January 2023

Universal-Investment-Gesellschaft mbH
The Management Board

INDEPENDENT AUDITOR'S REPORT

To: Universal-Investment-Gesellschaft mbH. Frankfurt am Main

Audit opinion

We have audited the annual report of the Berenberg Euro Enhanced Liquidity Investment Fund, comprising the activity report for the financial year from 01/01/2022 to 31/12/2022, the balance sheet and statement of assets and liabilities as at 31/12/2022, the statement of income and expenditure and the statement of appropriation, the development account for the financial year from 01/01/2022 to 31/12/2022 as well as the comparative overview for the last three financial years, the list of transactions concluded during the reporting period, insofar as these are no longer part of the statement of assets, and the notes.

In our opinion, based on the findings of our audit, the accompanying annual report complies in all material respects with the provisions of the German Investment Code (KAGB) and the relevant European regulations and allows a comprehensive view of the actual circumstances and developments of the investment fund to be obtained in accordance with these regulations.

Basis for the audit opinion

We conducted our audit of the annual report in accordance with Section 102 KAGB and German generally accepted standards for the audit of financial statements promulgated by the Institute of Auditors (IDW). Our responsibility under these rules and principles is further described in the "Auditor's responsibility for the audit of the annual report" section of our report. We are independent of Universal-Investment-Gesellschaft mbH in accordance with German commercial law and professional regulations and have fulfilled our other German professional obligations in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the annual report.

Responsibility of the legal representatives for the annual report

The legal representatives of Universal-Investment-Gesellschaft mbH are responsible for the preparation of the annual report, which complies in all material respects with the provisions of the German KAGB and the relevant European regulations, and for ensuring that the annual report gives a comprehensive view of the actual circumstances and developments of the investment fund in accordance with these regulations. In addition, the legal representatives are responsible for internal controls which they deem to be necessary in accordance with these regulations in order to facilitate the presentation of the annual report without material misstatements due to fraud (e.g., manipulation of the accounts and misappropriation of assets) or error.

When preparing the annual report, the legal representatives are responsible for including in the reporting events, decisions and factors which may have a material influence on the further development of the investment fund. This means, among other things, that when preparing the annual report, the legal representatives must assess the continuation of the investment fund by Universal-Investment-Gesellschaft mbH and have the responsibility to disclose facts in connection with the continuation of the investment fund, if relevant.

Auditor's responsibility for the audit of the annual report

Our objective is to obtain reasonable assurance as to whether the annual report as a whole is free from material misstatement due to fraud or error, and to issue a report that includes our opinion on the annual report.

Sufficient assurance is a high level of assurance, but not a guarantee, that an audit conducted in accordance with Section 102 KAGB and German generally accepted standards for the audit of financial statements promulgated by the Institute of Auditors (IDW) will always reveal a material misstatement. Misstatements may result from fraud or error and are considered material if it could be reasonably expected that they would affect, individually or collectively, the economic decisions of users made on the basis of this annual report.

During the audit, we exercise our best judgement and maintain a critical attitude. In addition

- We identify and evaluate the risks of material misstatement, due to fraud or error, in the annual report, plan and perform audit procedures in response to those risks and obtain audit evidence sufficient and appropriate to provide a basis for our audit opinion. The risk that material misstatements resulting from fraud will not be detected is greater than the risk that material misstatements resulting from error will not be detected, as fraud may involve fraudulent collusion, counterfeiting, intentional incompleteness, misrepresentation, or the removal of internal controls.
- We gain an understanding of the internal control system relevant to the audit of the annual report in order to plan audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of this system of Universal-Investment-Gesellschaft mbH.
- We assess the appropriateness of the accounting policies used by the legal representatives of Universal-Investment-Gesellschaft mbH in the preparation of the annual report and the reasonableness of the estimates and related disclosures presented by the legal representatives.
- We draw conclusions on the basis of the audit evidence obtained as to whether there is any material uncertainty in connection with events or circumstances that could cast significant doubt on the continuation of the investment fund by Universal-Investment-Gesellschaft mbH. If we conclude that there is a material uncertainty, we are required to make a note of the related disclosures in the annual report or, if the disclosures are inappropriate, to modify our opinion. We draw our conclusions on the basis of the audit evidence obtained up to the date of our audit opinion. However, future events or circumstances may result in the investment fund not being continued by Universal-Investment-Gesellschaft mbH.
- We evaluate the presentation, structure and content of the annual report, including the disclosures and whether the annual report presents the underlying transactions and events in such a way that the annual report provides a comprehensive view of the actual circumstances and developments of the investment fund in accordance with the provisions of the German KAGB and the relevant European regulations.

We discuss with those responsible for monitoring, among other things, the planned scope and timing of the audit and significant findings of the audit, including any material deficiencies in the internal control system that we identify during our audit.

Frankfurt am Main, 11 April 2023
