

Key investor information

This document provides you with key investor information about this fund. It is not marketing material.
The information is required by law to help you understand the nature and the risks of investing in this fund.
You are advised to read it so you can make an informed decision about whether to invest.

Trojan Global Income Fund (Ireland) (the "Fund"), Class F USD Accumulation (IE000CX9CNM2)
a sub-fund of Trojan Funds (Ireland) plc (the "Company")
Manager: Universal-Investment Ireland Fund Management Limited

Objectives and investment policy

Objectives

The Fund seeks to achieve income with the potential for capital growth in the medium term (3 to 5 years).

Investment policy

The Fund invests at least 80% of its assets globally in equities (which includes closed-ended investment funds) and equity related securities (investments whose value is linked to the performance of the shares in one or more securities such as depositary receipts, warrants and preference shares). The Fund may also invest in other asset classes including fixed interest and/or debt securities, money market instruments, investment funds, cash, cash equivalents, indices, deposits and indirectly in property. Exposure to property may be achieved through real estate investment trusts (REITs).

The Investment Manager's investment decisions will be based on an assessment of various factors including the potential for dividend growth and growth in cash flow and profits. The Investment Manager will seek to construct a portfolio of investments to deliver income but which may also grow in value over time.

The Investment Manager aims to construct a portfolio for the Fund that seeks to promote Climate Change Mitigation through an investment process which assesses a company's alignment to, or commitment to align to net zero greenhouse gas emissions by 2050. The Investment Manager also assesses the corporate governance practices of companies in which the Fund may invest. The asset classes to which this investment process applies are set out in the Investment Manager's Climate Change Mitigation Policy on the Investment Manager's website at <https://www.taml.co.uk>. It does not apply to other

assets within the Fund.

The Fund has no specific economic or industry focus.

Derivatives (a contract the value of which depends on the value of one or more underlying assets) may be used to manage the risk profile of the Fund, reduce cost or generate additional capital or income.

Benchmark:

The Fund is actively managed. The Fund has the discretion to invest in the investments as described above with no need to adhere to a particular benchmark. The MSCI World Index (Net Return) of the relevant currency share class, is used for performance comparison only.

Essential features of the Fund:

The currency of the Share Class is expressed in USD.

You can buy and sell shares in the Fund each business day. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility to request the purchase or redemption of shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

What does this synthetic indicator mean?

The shares of Class F USD Accumulation are classified in category 5 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.

The risk category has been determined on the basis of historical and simulated data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.

The lowest category does not mean a risk-free investment.

Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

Liquidity risk: Smaller companies' securities are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings.

Sustainability risk: The investments of the Fund may be subject to sustainability risks, meaning an environmental, social or governance ("ESG") event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment.

Position / Market risk: The investments of the Fund are subject to normal market fluctuations and the risks inherent in investment in securities markets and there can be no assurance that the value of the relevant securities will go up in value or that the investment objective will be achieved.

Financial techniques impact: The Fund may use derivatives to generate additional capital or income. A movement in the value of a derivative's underlying asset may have a much larger negative impact on the value of the Fund than if the Fund were to hold the underlying investment itself.

Counterparty risk: There is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the Fund, and the Fund may receive less or nothing.

Currency risk: As the Fund invests in securities which are not in the base currency, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

How can I get more information about the risks of the Fund?

For further information concerning the risks of the Fund, please consult the Prospectus, which is available at the registered office of the Manager and on www.universal-investment.com.

Charges

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.71%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The charges paid by an investor are used to cover the running costs of the Fund, including the costs of marketing and distribution of shares. These charges reduce the potential increase in value of an investment in this Fund.

The entry and exit charges shown correspond to a maximum percentage which might

be deducted from the investor's capital invested into the Fund. In some cases, the investor might pay less. The investor may contact his financial adviser or intermediary to be informed on the actual entry and exit charges.

The conversion of part or all of the shares into shares of another Fund or another Share Class is free of charge.

The ongoing charges figure is capped.

This figure excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective undertaking. The Fund's annual report will include detail on the charges made.

For further information concerning charges, please consult the heading "Fees and Expenses" of the Prospectus, which is available at the registered office of the Manager and on www.universal-investment.com.

Past performance

Past performance is not a reliable indicator of future performance.

All charges and fees, except for the entry and exit charges, were taken into account.

The past performance was calculated in USD.

The Fund was created in 2023.

This Share Class was created in 2023.

The Fund's performance may be compared against the MSCI World Index (Net Return) which may assist investors in evaluating the Fund's performance.

Practical information

Depository

The Bank of New York Mellon SA/NV, Dublin Branch
